

# CROPS

## CONFERENCE

# 2024

June 3-6, 2024

Huntsville, AL

## IMPROVING AGRICULTURE THROUGH GENOMICS

### OPEN TO STUDENTS AND PROFESSIONALS

**CROPS 2024** promises a fun introduction to Southern cuisine, history, and attractions. The conference program includes the opportunity to take advantage of Huntsville's vibrant collection of local microbreweries with a **'Hops on the Helix' beer festival**, as well a closing banquet and keynote address at the U.S. Space and Rocket Center, where attendees will enjoy dinner beneath the Saturn V moon rocket.

Our multi-day conference will be filled with talks from renowned experts seeking to address the intersection of newly emerging genomic technologies and their application to crop improvement. This year's topic: Improving Agriculture Through Genomics.

### KEYNOTE SPEAKERS

Gail Taylor, PhD, U.C. Davis

Neal Gutterson, Partner and Chief Technology Officer at Radicle Growth

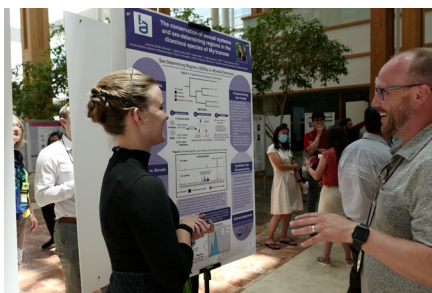

### CONFERENCE TOPICS

- A.I. and Agriculture
- Plant Stress Adaptations
- Plant Engineering
- Careers Roundtable
- + Networking Opportunities
